

The one that got away? Not this time.

When officers use **CloudGavel's Electronic Warrant Solution**, warrant processing can happen up to 90% faster.

CloudGavel is the nation's leading authority and provider of cloud-based electronic warrants.

CloudGavel is economical, easy to implement, and fundamentally improves the entire public safety ecosystem.

How does it work?

Current warrant processing is time consuming and can involve many individuals traveling for physical signatures.

CloudGavel offers a better way:

1. Officer on the scene uses the CloudGavel web app to generate a warrant.

2. The electronic warrant is securely sent to a judge for review and approval.

3. Judge reviews and electronically signs the warrant. Officer is notified of approval, prints and executes the warrant.

With CloudGavel the average turn around time from warrant submission to approval is 27 minutes.

CloudGavel is a cloud-based platform that allows users from any internet connected device — from anywhere and at any time — to quickly initiate, document, and submit a state-specific warrant or subpoena to a duty-judge for rapid review and electronic approval.

CloudGavel can save up to 90% of traditional warrant processing costs.

CloudGavel has been deployed in 125 agencies in 6 states and counting, with over 10,000 users and hundreds of thousands of executed warrants.

Law Enforcement Benefits

- Reduces or eliminates travel time
- Warrants can be completed on scene
- Officers can receive warrant approval within minutes instead of hours
- Video conferencing allows for administering oaths for affidavits

Judicial System Benefits

- Judge receives fast comprehensive warrant request electronically
- Judicial review can be conducted anywhere at any time on any internet connected device and allow a video conference with the requesting officer
- Electronic submissions reduce afterhours disruptions for the on-duty judge

“CloudGavel has decreased the time we spend on getting warrants signed and approved. We can now spend more time keeping our communities and citizens safe.”

Ben Horwitz

Director of Analytics
New Orleans
Police Department

“CloudGavel has not only improved our manpower efficiency, but it has enhanced our investigative abilities by helping us rapidly secure valuable evidence, information, and dangerous felons.”

Lt. John Windham

CIB Admin
Baton Rouge
Police Department
