

Electronic Warrant Platform

The nation's #1 eWarrant solution for the criminal justice system.

> User-Friendly Design

Generate and submit warrants securely from any internet-enabled device.

> Maximized Productivity

Create and approve warrants remotely, reducing processing delays

> Seamless Workflow

Optimize processes to save time and resources for critical tasks.

CloudGavel's three modules—eWarrants, eService, and eXchange—can be used independently, but together they form a comprehensive eWarrant solution. For maximum efficiency and streamlined operations, using all three modules in tandem unlocks CloudGavel's full potential.

A Complete Warrant Solution

Create. Service. Share.

eWarrants

The creation and approval of warrants electronically from any internet-enabled device.

eService

Track the status of all criminal warrants as they move through the justice process.

eXchange

Search and share all warrant data across jurisdictional boundaries.

eWarrants

Electronic Warrant Module

Initiate, document, and submit state-specific warrants electronically from any device. Speeds up processing by 90%, with an average turnaround of **27 minutes**.

Data Security: CJIS compliant and hosted in AWS GovCloud, the most secure cloud platform on the planet.

Configurable Workflow: Electronically route warrant requests with notifications across officers, prosecutors, clerks, and judges.

State-Specific Warrant Templates: Extensive library tailored to various state requirements.

eService

Warrant Service Module

Track active warrants securely, manage updates, and access criminal information. Integrates seamlessly with the eWarrant module or third-party systems.

Automated Data Integration: Seamlessly pull data from the eWarrant module for streamlined operations.

Tailored Solutions: Customized solutions designed to meet specific agency needs.

Enhanced Collaboration: Facilitates collaboration and information sharing among agencies for improved efficiency.

eXchange

Data Exchange Module

Access a comprehensive warrant repository to easily search and share data across jurisdictions.

Real-Time Sharing: Easily share all warrant data throughout the CloudGavel network.

Centralized Search: Efficiently search multiple data sources from a single interface.

Warrant Deconfliction: automatically resolves conflicts and duplicates in warrant records to ensure data accuracy and integrity.
